BENNETT COLLEGE STUDENTS LEAD DISCUSSION ON BLACK FARMING AND SUSTAINABILITY

The Bennett College Green Team made history by hosting the first-ever screening of the film *Farming While Black*, under the guidance of their advisor, Dr. Anne Hayes. The event highlighted the critical challenges facing Black farmers in the United States. The film's producer, Lynn Waymer, was featured as a special guest and speaker alongside local Greensboro panelists James Gardner from the PDY&F Community Garden and Lolita Watkins, representing the Triad Black Farmers' Market Network.

Bennett College students Beayonie Washington and Bhali Johnson skillfully moderated the post-film discussion, which delved into pressing topics such as the state of Black farmers, food sovereignty, Black land rights, human rights, and reconnecting with the soil and earth. This screening of *Farming While Black* was educational and a call to action, inspiring attendees to support Black farmers and continue the conversation on food justice and sustainability. The Green Team is proud to have facilitated such an impactful event, fostering a dialogue that aligns with Bennett College's commitment to leadership, empowerment, and social justice. For more information, contact Dr. Anne Hayes at anne.hayes@bennett.edu.

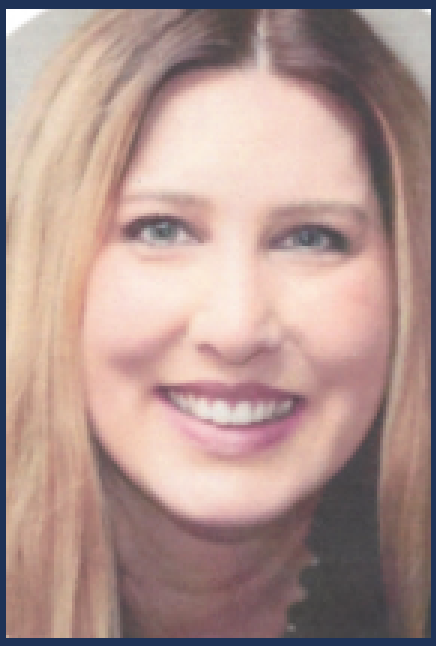

NEW NIH-FUNDED MENTORSHIP PROGRAM FOR BENNETT COLLEGE STUDENTS

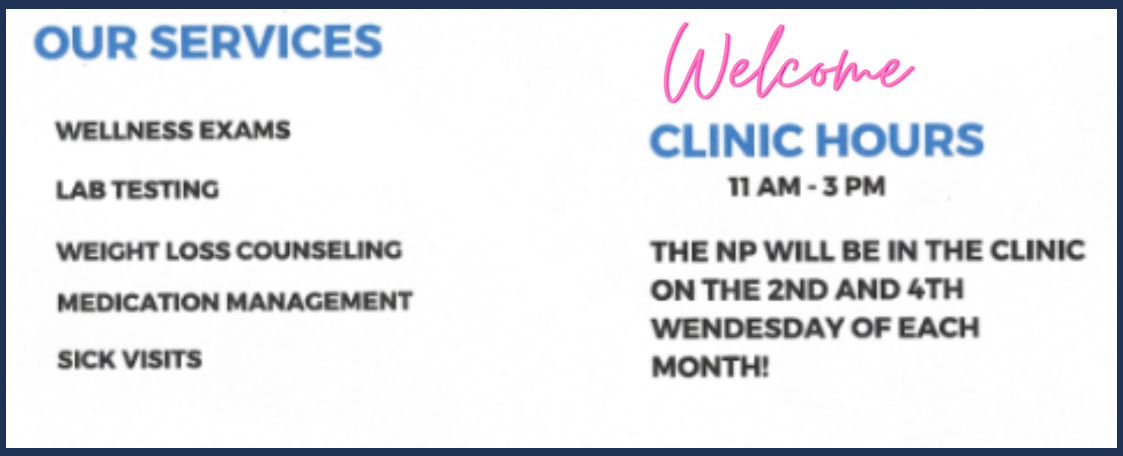

BREAKING NEWS

Beginning in the summer of 2025, Bennett College students will have the opportunity to engage in mentoring relationships and gain hands-on research experience through the NIH-funded Black or African-American Research Training Pathway to Otolaryngology and Communication Sciences (BAA-POCS) program. This comprehensive 15-month initiative and partnership, developed by Dr. Dennis Frank-Ito and faculty from Duke University Medical Center's (DUMC) Department of Head and Neck Surgery and Communication Sciences, provides rigorous training alongside professional development, social support, and preparation for graduate or medical school. The BAA-POCS program is dedicated to empowering Black students to pursue careers in biomedicine by fostering academic growth, relationship-building, and identity development.

Biology faculty members Professor Candice Young and Dr. Alex Jordan will serve as liaisons with BAA-POCS. Their first priority will be to identify the initial cohort of Bennett students for this transformative program. The application process is scheduled to begin in January 2025.

WELCOME BACK, MRS. ANGELA OLALERE, FNP, TO THE BENNETT COLLEGE WELLNESS CENTER INITIATIVE

We are thrilled to welcome Mrs. Angela Olalere, Family Nurse Practitioner (FNP), back to the Bennett College Wellness Center as part of our #WellBelle initiative. Angela brings professional expertise and a personal passion for promoting health and wellness. She is excited to be back at Bennett College, where she will provide vital health services to our students twice a month. With her guidance, the Wellness Center will continue to offer top-quality care, supporting our community's physical and emotional well-being.

We look forward to seeing her impact on our students as part of the ongoing #WellBelle initiative, which prioritizes comprehensive health and wellness for all Belles. The Health Center is located in the Catchings Building. Walk-ins are welcomed, or appointments may be made by calling 336-517-2230 or email at Health_Center@bennett.edu.
